Navarro Co

Birdston, Tex. March 31,
1880.

Dr Geo. Engelman;

Dear Sir;

I find it difficult to name satisfactorily many of the plants of this region, & would esteem it a great favor if you will examine & name some specimens for me. I have now on hand specimens of 100 or more doubtful plants, including several Cruciferae, ^{a Claytonia} a *Ballinshöi*, a *Lupinus*, an *Astragalus*, a *Sophora* (?) & other Leguminosae, 1 or 2 Brassulaceae, 2 or 3 Enotherae, ^{2 or 3} some Umbelliferae, a *Galium*, a number of Compositae, ^{some Callitricaceae} 1 or 2 Crozoneae, some few Eriogonae, & a number of Cyperaceae & Gramineae.

If you will kindly undertake to examine all or any particular portion of them, I will send you the specimens, numbered & labelled with dates, localities &c. You can retain the specimens, sending me a list of the names & numbers.

Address,

J. E. Joor,
Birdston,
Navarro Co.,
Texas.

Enclose p.c. for answer.
Also a little aquatic plant I found
in Limestone Co. 2 years ago. Please
tell me its name
